

## GAME & FISH STAFF NOTES

### Hildebrand, Schadewald Receive Award

Dean Hildebrand, Game and Fish director, and Paul Schadewald, chief of administrative services for the Department, were recipients of the 2004-05 Outstanding Achievement in Digital Government Award.

The Information Technology Council of North Dakota presented the award during the North Dakota Chapter of Commerce Statewide Awards Banquet in March in Bismarck.

Statewide Awards seek to identify and recognize North Dakotans who have shown outstanding leadership in a particular field or endeavor.

### Bailey Named Fisheries Biologist in Riverdale

Paul Bailey has filled the position vacated by Jason Lee as fisheries biologist in Riverdale. His responsibilities include assisting in fish management for the north central fisheries district.

Bailey has a bachelor's degree in wildlife and fisheries science from South Dakota State University, and a master's degree in zoology and physiology from the University of Wyoming. A Bismarck native, Bailey was a regional fisheries biologist for the Wyoming Game and Fish Department before relocating to Riverdale.

### Lee Lands Fisheries Position in Bismarck

Jason Lee, fisheries biologist at the Department's district office in Riverdale since 1992, has been named district fisheries supervisor in Bismarck. His new duties involve fisheries management responsibilities for south central North Dakota.

Lee, a native of Stanley, has a bachelor's degree in fisheries and wildlife biology from the University of North Dakota.

### Berard Earns AFS Honor

Emil Berard landed the Dakota Chapter of American Fisheries Society Distinguished Professional Service Award in March in Bismarck at the group's annual gathering.

Berard, southwest district fisheries supervisor in Dickinson, has been a member of the Dakota Chapter since 1972. He began his career with the Game and Fish Department in 1972 as a district fisheries biologist in Riverdale.

In 2003, Berard was inducted into the North Dakota Fishing Hall of Fame for his effort in establishing a salmonid population in Lake Sakakawea.
